

# Create Jenkins User

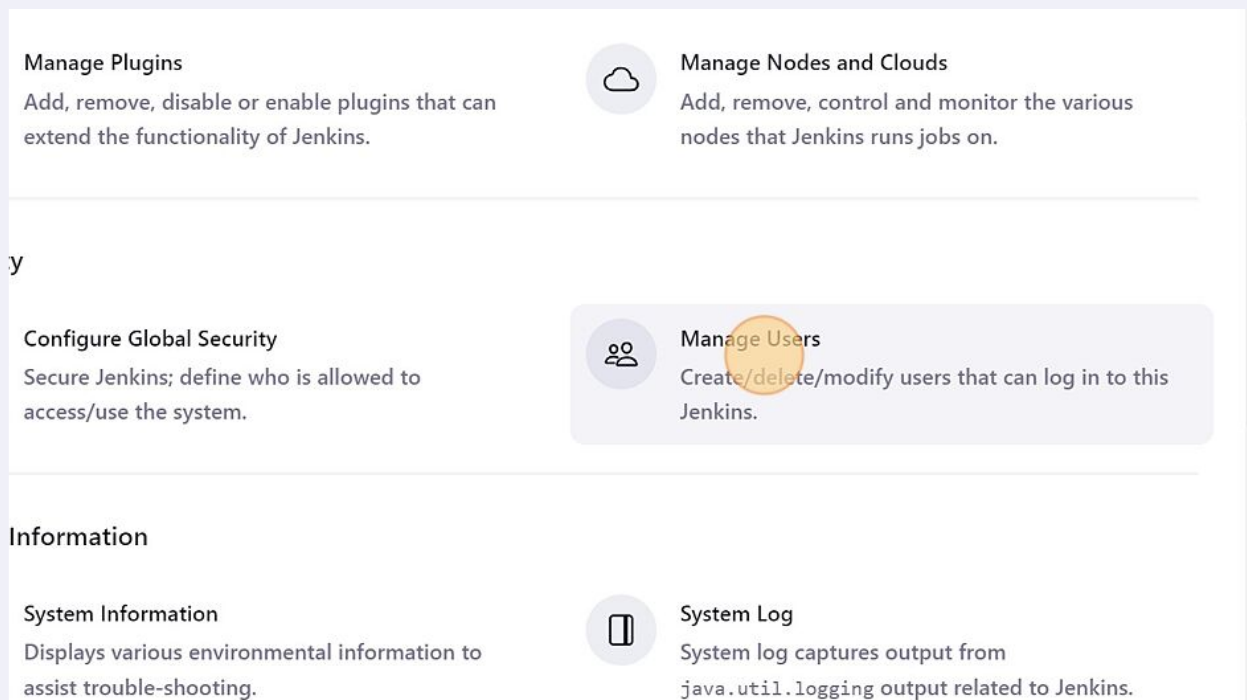

## 1 Go To Dashboard

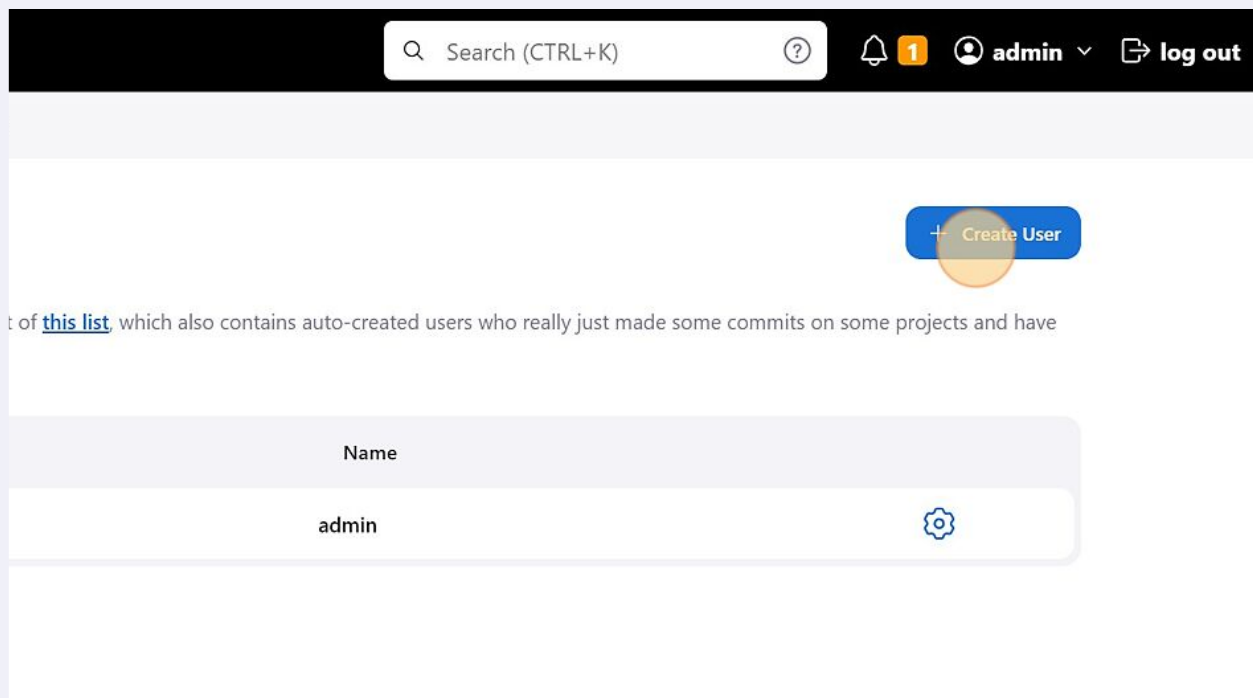

## 2 Click "Manage Jenkins"

## 3 Click "Create/delete/modify users that can log in to this Jenkins."

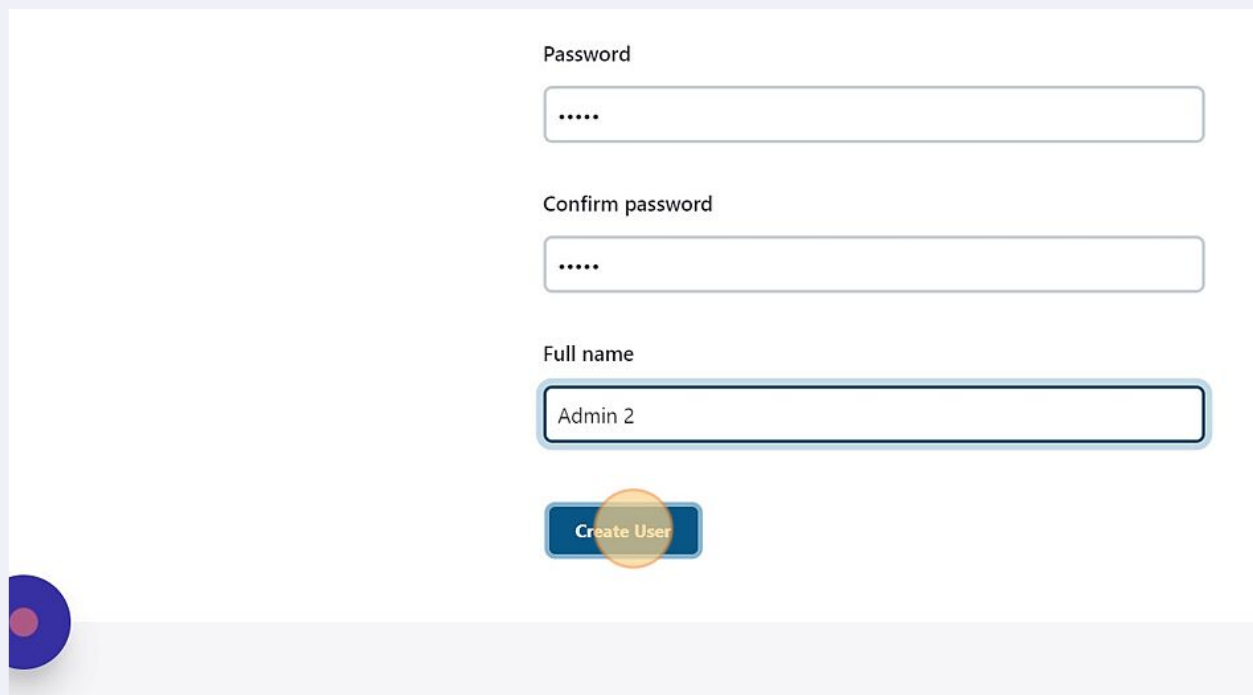

#### 4 Click "Create User"

The screenshot shows a web application interface. At the top, there is a dark navigation bar with a search bar containing the text "Search (CTRL+K)", a notification bell with a red "1", a user profile labeled "admin" with a dropdown arrow, and a "log out" button. Below the navigation bar, there is a light gray header area. The main content area has a white background. On the right side, there is a blue button with a white plus icon and the text "Create User", which is highlighted with a yellow circle. Below this button, there is a text snippet: "t of [this list](#) which also contains auto-created users who really just made some commits on some projects and have". Below the text, there is a table with a light gray header row. The header row has a column labeled "Name". Below the header, there is one row with the text "admin" and a blue gear icon to its right.

#### 5 Add required details and Click "Create User"

The screenshot shows a user creation form. It has three input fields: "Password" with masked text ".....", "Confirm password" with masked text ".....", and "Full name" with the text "Admin 2". The "Full name" field is highlighted with a blue border. Below the fields, there is a blue button with the text "Create User", which is highlighted with a yellow circle. In the bottom left corner, there is a blue circular icon with a white dot in the center.
